ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

As the Sanborn Fire Insurance maps do not cover this portion of town until 1909, the construction date estimate is based on dates for similar homes in Excelsior Springs. The house and spring house/pavilion were constructed by at least 1908, when the *Excelsior Springs Blue Book* lists the "Imperial Lithia Spring" at 406-408 Isley. Furthermore, both structures are present in the 1909 Sanborn map (see below). Historic advertising lists the owner and manager of the well at Deep Dale Cottage at 406-408 Isley as C. A. Hartshorn. The water was touted as "Nature's Own Remedy for Rheumatism, Bright's Disease, Diabetes, Diseases of the Stomach, Kidney and Bladder." In 1917 and 1922 directories, W.C. Allen was the owner/occupant of the "Deepdale Cottage," and in 1940, Mrs. Hollie Dagmar was the resident. By 1926, the spring house/pavilion is no longer shown on the Sanborn map.

The Imperial Lithia Spring was one of fifteen calcium springs in Excelsior Springs - the calcium bicarbonate (lithia) group. The chemical analysis of the water, always an important marketing tool for the various mineral and spring waters in Excelsior Springs and prepared by E.M. Perdue, Professor of Bacteriology at Hanemann Medical College in Kansas City, Missouri, is listed below in a historical advertisement (also featuring a photo of the well pagoda).

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

The house is located on a level grassed lot near the northeast corner of the intersection of Isley Blvd. and Saratoga Avenue. There are two vacant lots on either side, but the remainder of the block to the west contains historic residences from the same period. There is a grassed median and sidewalk at the curb, and a concrete sidewalk leading to the entry on the front porch. There are deciduous shade trees in the front yard. The property is Clay County parcel ID: 12-312-00-19-013.00, Lot 17, Block 4, Saratoga Addition.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

This 1 ½ story house has a basic rectangular plan, modified with a three-sided bay in the front, a small inset at the northwest corner of the house, and a small bay extension at the northeast corner. The first story façade is clad in PermaStone siding, while the remainder of the house is stucco except for the northwest inset bay, which has shiplap siding. The steeply pitched central hip roof has lower cross gable bays on the south façade, west and rear (north) elevations. There are also hip roof dormers on the front and east elevation. The full width front porch has a shed roof supported by four turned columns, while the balustrade is simple square wood. There are two front entry doors, and windows are 1/1 and set within slightly projecting entablature frames. Since the 1994 survey, the only alterations are the addition of porch railings. Due to siding alterations, the house is likely not individually eligible, but would be considered a contributing resource to a potential historic district.
