ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

The lot on which the Jones Soda Well and pavilion was located is vacant in the 1900 Sanborn map, but by 1905, a rooming house – The Geneva – was constructed. By 1913, there was a one-story addition location on the east front of the property (the sales pavilion). The 1908 city directories do not list Jones Soda Well, but it is in the 1917 directory, leading to a construction estimate for the well & pavilion of ca. 1910. The proprietor, Thomas W. Jones, formerly worked as the pump man at Siloam Spring for several years. Mr. & Mrs. Jones lived behind the pavilion in the one-story wing of the main building, while renting out rooms in the two-story building. The water belonged to the *soda bicarbonate* group, and was purportedly the strongest soda water in town, as well as one of the more popular. However, there are three different mineral analyses listed for the water: one on file at the Excelsior Springs Museum & Archives; another in *The Waters of Excelsior Springs*, and a third in an advertisement in the 1917 City Directory. The Jones Soda Well was still listed in the 1922 directory, although the Jones were not noted as residents. Alex Shepherd purchased the springs and the apartment building in 1924 from F. G. Taggart. It was one of the ten wells purchased by the city and piped into the Hall of Waters in 1935. By 1942, the pavilion and boarding house were demolished.
